The spam update that would not end

For anyone whose traffic dipped since 24 September.

THE DATES

15 days

Still rolling since 24 September

Google's Search Status Dashboard still says ongoing.

FOR COMPARISON

The other three took under 3 days

March: 19 hours. June: 2 days. August: under 3 days.

CHECK 1

When did your drop start?

Before 24 September? It was not this update.

CHECK 2

Set Search Console to 16 months

Compare with the same weeks last year before you blame Google.

CHECK 3

Position down, or only clicks?

Position steady and CTR down means the results page changed, not your rank.

THEN

Wait for the end date before judging

Changes made mid rollout cannot be measured yet.
